## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 2\_Q7

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### **Section 1 : Coding**

##### **1. Problem Statement**

You are taking part in a coding challenge where your task is to design a program that conjures a mesmerizing numerical pyramid pattern. The enchanting pattern is fashioned using a for loop and is customized based on user input.

Participants are prompted to unveil the pyramid's magic by specifying its height - essentially dictating the number of rows in this spellbinding creation.

Write a program that employs to weave this captivating numerical pyramid as shown below.

Example

Input:

4

Output:

### ***Input Format***

The input consists of a positive integer n representing the number of rows in the pattern.

### ***Output Format***

The output prints the required pyramid pattern, as shown in the sample output.

Refer to the sample output for the formatting specifications.

### ***Sample Test Case***

Input: 4

Output: 1

123  
12345  
1234567

### ***Answer***

```
import java.util.*;  
class NumericalPyramid {  
    public static void main(String[] args) {  
        Scanner sc = new Scanner(System.in);  
        int n = sc.nextInt();  
  
        for (int i = 1; i <= n; i++) {  
            for (int space = 1; space <= n - i; space++) {  
                System.out.print(" ");  
            }  
            int numCount = 2 * i - 1;  
            for (int num = 1; num <= numCount; num++) {  
                System.out.print(num);  
            }  
        }  
    }  
}
```

```
        }  
    }  
    System.out.println();
```

**Status : Correct**

**Marks : 10/10**
